

# Documentations

1. enter into “pi” folder
2. open command terminal in “pi” folder
3. type command “python pi.py” and press Enter

A screenshot of a terminal window with a dark background. The title bar at the top reads "jit@jit-HP-ProBook-440-G1: ~/Desktop/freelancer/jitshil/pi". The terminal content shows a prompt "(base) jit@jit-HP-ProBook-440-G1:~/Desktop/freelancer/jitshil/pi\$" followed by the command "python pi.py". Below the command, the text "Please Enter Number of digit: 10000000" is displayed, and a cursor is visible on the line below it.

```
(base) jit@jit-HP-ProBook-440-G1:~/Desktop/freelancer/jitshil/pi$ python pi.py
Please Enter Number of digit: 10000000
█
```

4. result save in pi\_digits.txt file.
